

EFI Gravure Proof Paper 4245 Semimatt

The FOGRAcert EFI Gravure Proof Paper 4245 Semimatt is designed for use with the latest ink generation of the leading printer manufacturers. It meets the industry's most stringent quality and consistency requirements. A very low content of optical brighteners guarantees a high colour stability - metamerism effects are minimised. The microporous, PE coated media hits the FOGRA Norm 39L without any problems. The white point of the 4245 barely departs from the predetermined value defined by ISO 12647-7. In most cases the simulation of the paper white becomes redundant.

Das EFI Gravure Proof Paper 4245XF Semimatt ist ein universell einsetzbares, PE-beschichtetes, mikroporöses Proofpapier für den Offset- und Tiefdruck. Der sehr ähnliche Weißpunkt des EFI Gravure Proof Paper 4245XF Semimatt zur ISO 12647-7 bzw. FOGRA39 ermöglicht eine Prüfdruckerstellung ohne Papierweißsimulation.
